Experience

UI Designer

Artisan Digital / Jan 2021 - Present

- Designed visually appealing digital products with a great user experience.
- I introduced the team to an Atomic Design System to help declutter our components and make the handover to developers a smoother experience.
- Motion designed to show how certain features should animate and created the motion graphic for Ball Magnets.
- Sole front-end web developer for BlueBet and developed using React.js and Material UI as the UI Kit.
- Prototyped designs to help clients and developers get a better understanding of how a feature or product is meant to function.
- Working closely with back-end team which gave me thorough understanding on how the API works and the limitations it had, which allowed me to design and prototype products that were realistic and achievable.
- Working in an AGILE environment.

UX/UI Designer (Internship)

Scriibi / Dec 2019 - Feb 2020

- Was an Intern at Scriibi as a UX/UI Designer and a Front-end web developer.
- Responsible for the redesign of the web application and worked alongside the back-end team to develop the visuals of the website.
- Conducted user testing sessions which helped me pinpoint issues with the site and provided solutions from gathered data.
- Was also part of the team that proposed an alternative tech stack that improved the speed and scalability of the product.

Web Designer/Developer (Placement)

Travel Dialysis Review / July 2017 - Dec 2017

- Worked in a collaborative environment.
- Designed the User journey and website navigation flow using Figma.
- Designed logos and created style guides for the brand.
- Wireframed and designed a responsive website.
- Developed the front-end of the site using HTML, CSS, Javascript.
- Developed back-end of site using PHP and MySQL.
- The work done during placement was also featured on Swinburne's newsletter.
